

Wanted from Track and Road.

L. W. HESS, Editor.

R. Robinson of Marquette, Ill., has a good sire in Geo. H. Low, son of Florida. He is the sire of Eva, 2:33; Mill Boy, 2:57; and other colts that promise speed.

B. J. Butler, owner of Butler's Bashaw, 2:28; has arrived home from California. He informs me that he will have his horse here in a day or two, and that he will let him make the season here.

Thomas Miles who has leased the new track for this season, has had it harrowed during the week so that it is now fit to jog on. Mr. Miles' horses have without exception wintered well and all look sleek and fat. He expects to make some of his colts trot quite fast.

W. J. Neely has his trainer, "Mike," jogging a number of good colts, among them are a few by Ottawa Chief, 2:25; that promises to go faster than their sire.

Crit Davis has commenced jogging Prince Wilkes, 2:16; Johnston, 2:06; McLeod, 2:21; and Katherine S., by Messenger Chief.

L. E. Flaughner, Ripley, O., sold the mare Pearl medium, 2:27; by Happy Medium, dam, Pearl, by Gentle Breeze, to J. Fitzgerald, Maysville, Ky. This filly trotted in 2:29 as a three-year-old, and make her present record last season in her 4-year-old form.

Mr. Wm. Redding shipped eleven trotters, including Misty Morning, 2:21; and Molly Wilkes, 2:22; to Cuba, on Wednesday of last week. Charley Dickerman accompanied the consignment.

Some particulars are given of the sale of the noted pacer L. C. Lee, which was noted in a recent issue as follows: "Then came the event of the day. The celebrated pacer stallion L. C. Lee, with a pacing record of 2:15, and said to be the fastest pacer stallion in the world, was brought forward. The first bid made was \$5,000, and rapidly rose to \$8,000 in 1,000 bids. Then the bidding rapidly went forward at \$100 advance until it reached \$9,700, when one of the bidders promptly called out \$10,000. At this there was a cheer that shook the whole building. After vainly endeavoring to secure an advance he was knocked down at that figure to Mr. James Healey, of Leadville. The auctioneer stated to Mr. Healey that Col. Morrissey desired the privilege of breeding one of his favorite mares to L. C., which was granted. Col. Morrissey refused \$15,000 for this stallion some time ago."

Walter Pierce of Sharpville, Pa., has matched the chestnut gelding, Doctor Almont, 2:21; by Almont Boy, against the bay horse Trouble, 2:24; owned by W. A. Lambert, Orangeville, Ohio, for \$500 a side. The race will be trotted at the Cleveland Grand Circuit meeting.

James Page of Denver, Col., paid \$10,000 for the pacer stallion L. C. Lee, 2:15; at the John D. Morrissey sale last month. He now offers to match him against any pacer stallion in the world, mile heats for \$10,000.

The famous mare Wildflower, by Electioneer, that reduced the two-year-old record of the world to 2:21 in 1881 foaled a bay filly on March 15, by Piedmont, 2:17 1/2.

Geo. H. Hopper of Unionville, Ohio, has purchased the black colt Nominator, foaled Feb. 11, 1886, by Electioneer, dam Consolation, by Dictator, from Palo Alto Farm. He cost \$4,500.

Lyle E. Simmons, the former driver of the trotters Early Dawn, Eagle Bird, &c., a son of William L. Simmons, is one of the latest additions to the running turf. He has a stable of youngsters at Lexington, and they will be trained by himself. Among the lot is a half sister of himself, and a full sister of Jack of Hearts.

Walter Pierce of Sharpville, Pa., has matched the chestnut gelding Dr. Almont, 2:21 1/2; by Almont Boy, against the bay horse Trouble, 2:24 1/2, owned by W. A. Lambert, Orangeville, O., for \$500 a side. The race will be trotted at the Cleveland Grand Circuit meeting.

Annals Political.

Eight candidates for aldermanic office in seven wards, and several back districts in the flint bottle and other bottle districts to bear from! If imitation of the late departed Wiggins was not punishable by instant contact with the business end of an indignation meeting, we might be pardoned in prognosticating warm weather on Tuesday. There has been a rain of candidates, a sixling, sozily rain without ceasing. The way of the candidate is various: Ordinarily when a gentleman conceives the idea of running for alderman, he consults the fellow who owes him \$2.50. He of the \$2.50 debt thinks it a capital idea, and so does his better half, who does not see why women cannot vote too. Then the candidate hints that several prominent citizens of the ward have requested him to be a candidate, and accordingly announces himself.

In the First ward, ex-Alderman Emmet Skinner and Mr. John Hilliard labor with the denizens of the south bluff.

The Second ward rejoices in the candidacies of W. W. Taylor, and Jackson R. Shaver. There are no issues to enlarge upon, and the gentlemen whose popularity is the greatest will have things to his own liking.

The Fourth ward, as far as heard from, presents the name of Wm. Stormont, and M. Dinneen, gentlemen of good business ability, and Mark Duffy and J. F. Murphy. Two places are to be filled.

Four candidates for one place are out in the Third ward—Messrs. Colwell, Hess, Fox and Meagher. It is presumed that Mr. Meagher will attempt to bring out a full vote, if carriage service can be considered an efficient method. There is no combination, each is working his own claim.

There is a clamor from five throats in the Fifth ward. Mr. T. D. Collin, of the Ottawa Window Glass Co., President of the Dis-

ness Men's Association, is the favorite of the business element and has a strong following in glass circles. Mayor Jerry Canby, of Zulu, thinks he has the inside track on one of the places. John W. Brown, P. J. Kelly and John Malcom, are also making time in the race.

The Sixth ward has but one candidate, the tireless and efficient W. H. Hull.

In the Seventh ward, M. N. Armstrong and W. W. Wilkinson are candidates. The latter will run on the Prohibition platform, while Armstrong is standing upon the platform of improvement.

Several are sure to emerge from the back doors of their residences on Wednesday morning and travel toward on the back streets. Who they will be for the ballot to determine.

Work on the foundation of the new Santa Fe depot at Galesburg, is being crowded along. A gang of thirty-four men is engaged mixing and laying concrete and putting in place the heavy foundation stones.
